

# Homework 4

Carson  
Murray

① 71 42 21 7 99 20 1 19 4

Swap 42 71 21 7 99 20 1 19 4

Swap 21 42 71 7 99 20 1 19 4

Swap 7 21 42 71 99 20 1 19 4

7 21 42 71 99 20 1 19 4

Swap 7 20 21 42 71 99 1 19 4

Swap 1 7 20 21 42 71 99 19 4

Swap 1 7 19 20 21 42 71 99 4

Swap 1 4 7 19 20 21 42 71 99

Sorted with 7 Swaps  
and 29 Comparisons

②

Original Graph

Step 1: remove (d)

Step 2: remove (a)

Step 3: remove (b):

Step 4: remove (c):

Step 5: remove (e):

Step 6: remove (g):

Step 7: remove (f)

# Homework 4 Part 2

Munday

② Continued...

Yes a topological Sorting Solution exists for this graph because it is Directed and acyclic

The Topological Sorting Solution is:

a, b, c, e, g, f

③  $p = \boxed{17}$  19 11 -31 51 42 -4  $n = 7$   $k = \frac{7}{2} = 4$

⑤  $i \rightarrow 11 \mid 17$

⑤ swap

$p = \boxed{17}$  11 19 -31 51 42 -4

⑤  $i \rightarrow -31 \mid 17$   
swap

$p = \boxed{17}$  11 -31 19 51 42 -4

⑤  $i \rightarrow -4 \mid 17$   
swap

$p = \boxed{17}$  11 -31 -4 51 42 19

SWAP A[p] and A[S]

⑤  
0 1 2 3 4 5 6  
-4 11 -31  $\boxed{17}$  51 42 19

Does  $S = k-1$   $S = 3$   $k = 4$   $-3 = 4-1$  YES

17 is the 4th Smallest Element in this array
